PROFILE

Aspiring software engineer with hands-on experience in web development, IT support, and networking. Backed by strong academic performance at Nelson Mandela University and Eduvos, with distinctions across key modules. Proficient in C#, Java, Python, Delphi, and front-end web technologies. Passionate about building practical, scalable software and continually expanding knowledge in cybersecurity and modern development practices. Currently developing a personal portfolio and seeking an opportunity to contribute to a professional software team while growing as a developer.

TECHNICAL SKILLS

Languages: C#, Python, Java, Delphi, JavaScript, SQL, HTML, CSS, PHP

Frameworks/Tools: Git, MySQL, Visual Studio, VS Code, basic networking, CCTV setup

Other Skills: IT support, Network security, CCTV systems, Troubleshooting

Certifications: Sophos, Acronis, ESET MSP (see full list below)

PROJECTS

Mzansi Market (*University Project*)

Website built for a fictional South African e-commerce startup. Features include product listings, categories, a cart system, and basic checkout flow.

 mzansimarket.is-best.net

SEAC Electricians Website (*Freelance Client*)

Fully responsive site developed for a registered Cape Town electrician using HTML, CSS, JS. Showcases services, company background, and contact form.

 seac.co.za

Portfolio Website (*Ongoing*)

Multi-page portfolio site showcasing CV, skills, and project links. Based on a Bootstrap template with custom edits.
